

# WHAT IS RETINOBLASTOMA?

**Most common cancer of the eye in children less than 2 years old**

**Affects the RETINA, the innermost layer of the eye FOR NORMAL VISION**

**Can be hereditary or non hereditary**

**May spread to the brain and other parts of the body**

**May lead to total blindness and even death if not treated**

**EARLY DETECTION can prevent blindness and EYE REMOVAL**

**LET'S DO OUR SHARE**

**SAVE LIFE \* SAVE EYE \*  
SAVE SIGHT**

**When in doubt, consult  
your friendly surgeon**

A surgeon who is a Fellow of the Philippine College of Surgeons has undergone accredited surgical residency training and passed certifying board exam
